Allowable Subject Matter

Claims 41-45, 92 and 93 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art fails to show or fairly suggest an electromechanical system including at least a structural plate disposed relative to a mechanical stop, which disposition is subject to stiction that is overcome by use of a DC voltage application to an actuator which causes the mechanical stop to move relative to the structural plate from a static position to a displaced position, thereby overcoming stiction forces.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Direct inquiry concerning this action to Examiner Dougherty at (571) 272-2022.
